Note: This is ONLY for reporting spam, advertising and problematic broadcasts (interruptions, battles, or roughness). From ARK: Survival Evolved Wiki The Broodmother Arena is an arena to fight broodmother boss Lysrix. The arena is 37 °C or 100 °F so it brings good Hyperthermia protection. Calien soup is highly rumored! Location[edit | source edit] The Broodmother Arena itself is located under a green Obelisk, outside the usual playable area, but a portal that can be opened from any obelisk or Supply Box. When created, it immediately embodies a portal that flies everything within a radius of 20 moments. In the case of Tek Cave, a maximum of 10 survivors and 40 creatures are allowed, but only 20 creatures can be battled at any time to the arena itself every war. Most Arenas block survivors to land creatures only. There are a few exceptions: Exceptions for a specific arena arena are only valid for the arena listed. For example the Manticore Arena refers to the Manticore Arena on Scorched Earth but not the Ragnarok Arena where you also have to go against Manticore. The drag weight of the creature must be less than 560. This is how much the creature itself weighs in, rather than the weight of carrying it seen in its inventory. To see the value in this game, place the creatures on the Elevator Platform with empty inventory and no saddles. Edited notes | edit source] Anything passing through the edge of the portal will not be broadcast. If Broodmother is not defeated before timers run out, all the players and prosperous creatures still in the arena will die, and their inventory will disappear. [[fr:Arène de la Broodmother]] On this Island, there are four Arenas to fight game bosses: Broodmother Lysrix, Megapithecus, Dragons, and finally Overseer. DLC Arenas[edit | edit source] Manticore Arena featured in DLC: Scoring the Earth where survivors must beat Manticore. The center has an arena where both Broodmother and Megapithecus must be defeated at the same time. Similarly, Ragnarok has an arena where both The Manticore and the Dragons must also be defeated together. Forsaken Oasis is the arena boss featured in the DLC: Valguero where survivors must deal with Megapithecus, Manticore and dragons. There is a separate arena to fight Broodmother as well. Rockwell Arena featured in the DLC: Aberration where survivors must defeat Rockwell. King Titan Arena, Desert Titan Arena, Ice Titan Arena, and Titan Forest Arena featured in the DLC: Extinction as part of the map instead of a separate section. All snorted bosses (Titan) are on the map, rather than being found in their Arena VR is displayed in the DLC: The incident in which the Damaged Parent Guard lives. Survivors must have enough mission to spark a fight through HLN-A. Location[edit | edit source] Broodmother, Megapithecus, and Dragon Arena are located under every three Obelisks. To get to this location, the player must go to the Supply Box or Obelisk and place the required tribute items in it, then click on the Broodmother Generating Portal, Generate a Megapithecus Portal, or Generate a Dragon Portal item. At this point a portal will be opened to the teleport of players and dinos nearby into the arena. The Supervisor Arena is accessible by completing the Tek Cave in the volcanic and teleporting caldera to the Observation Deck. Total Honor [edit resources] Tribute Requirements[edit | edit source] This does not apply to Moeder Arena or System Root access. Rewards[edit | edit source] Harder difficulties in certain bosses will award the hyster from all previous difficulties. 2Ragnarok Arena contains Manticore and the Dragons, which gave their Techgrams upon death. Defeating both unlocked the exclusive Tekgram listed. 3 This is the level required to enter the Easy Arena for the Broodmother Lysrix, the lowest level arena. Tamed Creatures compatible these restrictions do not apply to the Extinction arena as bosses struggle to take place on the map rather than in separate sections of the map entry restrictions: A maximum of 10 survivors and 20 creatures are allowed to enter the arena. In the case of Tek Cave, a maximum of 10 survivors and 40 creatures are allowed, but only 20 creatures can be battled at any time to the arena itself every war. Most Arenas block survivors to land creatures only. There are a few exceptions: Exceptions for a specific arena arena are only valid for the arena listed. The drag weight of the creature must be less than 560. This is how much the creature itself weighs in, rather than the weight of carrying it seen in its inventory. To see the value in this game, place the creatures on the Elevator Platform with empty inventory and no saddles. Edited notes | edit source] Entering / Leaving Arena[edit source] Others[edit source] Cryopod cannot be used in any part of the boss arena. PC version To be broadcast into the DAN arena out of the arena, you MUST be relegated. If you are installed when you teleport into the arena, you teleport and dismount. If you are installed when you teleport out of the arena, you do not die, but your dino gets a huge amount of torpor. Extinction and Genesis[edit | edit resources] Teleportation to the area or Titan bosses sngged in Genesis does not require you to Restrictions on Equipment and Structures | edit source] No structure can be placed in the arena. So avoid forming a plan that revolds around if you try to put anything away, no ground point or snap messages available will be displayed. Grape hooks can be brought into the arena, but once equipped with a crossbow they cannot be fired. (Perhaps related to why Thylacoleo is not teleport to the arena.) Quetzal, though itself may be outstretched into the Manticore Arena, may not evade in it if wearing the Platform saddle with at least one structure. All Tek gear and saddle Tek are banned from mainly the island's bosses (Excluding Tek Cave/Overseer Arena) and Manticore Arena, and trying to wear them inside when entering whether to complement them, or fall where the boss is summoned) Loss Items[edit source] You will lose the same and dinosed items only when the boss is summoned) Loss Items[edit source] You will lose the same and dinosed items only when the arena is edied Similarly, if no survivors were in the arena when the portal drew dinos in, all dinosaurs would die immediately. This excludes arenas in Extinction. Various changes[edit resources] Due to the hard consequences of bosses who fail to fight (see bullet point above), it is highly advisable to prepare before trying out the boss's struggle. Watching an online video of another ARK player that completes the Boss's struggles is a great way to elaborate your strategy first. However, there are plenty of changes to the Boss Arena during game development, so be sure to watch the video recorded after the last patch converts the Arenas Boss. Also Singleplayer bosses are weaker than Multiplayer Bosses, but never underestimate Bosses.
